Subject: Microsoft Settlement

To USDOJ,

Settlement is a bad idea.

Any proposed settlement that would effectively allow Microsoft to continue in it's abuse will be bad for everyone. Microsoft can not be trusted to do as they say; enforcement is needed.

Moreover, any proposal that would extend Microsoft's OS monopoly into the education sector would be disaster for consumer choice. If Microsoft takes over the education market, the Apple platform's long-term viability will be threatened.

Please, do not settle on Microsoft's terms.
